

# Dataset Description: Motorcycle Accidents in Colombia

The GRAPH Courses Team

April 2024

## Overview

This dataset contains police records of deaths resulting from motorcycle-related road injuries in the city of Medellin between 2012 and 2015. It focuses exclusively on fatal incidents involving motorcyclists, both drivers and passengers.

## Data source

Data was accessed from the Zenodo database [here](#).

The relevant dataset at the linked site is called “Dataset 1.xlsx”. In the second sheet of that xlsx file, you will find a data dictionary.
